CLARA CAO claracao99@gmail.com Website LinkedIn

Product designer at Bolt, shaping the app millions of people use to get around their city. I find the problem worth solving, build the answer in real code with AI, and turn messy flows into calm, effortless experiences.

Experience

Product Designer, Rider Experience, Bolt Mar 2026 – Present

- Designed price-drop alerts for riders who abandon a search: +0.5% finished orders, +0.7% retention.
- Designed deferred payment, so new users see prices before adding a card: +0.9% GMV per new user.
- Led the design of Order for someone else, from problem framing to handoff; now in development.
- Designed an airline picker for airport drop-offs, now piloting at 10 airports incl. Heathrow and CDG.
- Redesigned pickup confirmation, with a significant drop in ride cancellations and rider no-shows.
- Redesigned the search bar, now live for all riders, and the route shine animation on the map.
- Built the rider prototype library on Clay, Bolt's design system, in real code with AI (SwiftUI, React).

Associate Product Designer, Bolt Sep 2025 – Mar 2026

- Redesigned the Rides tab into Activity: past, ongoing and upcoming orders in one feed, live globally.
- Added a recent-ride map card with rebook, rate and tip shortcuts, and Family and Work profile filters.
- Ran usability research and shipped with the rides, car rental and micromobility teams.
- Led the design of Account tab v2, merging the side menu and profile into one screen, live in all markets.
- Designed co-badged card scheme selection (Visa, Mastercard, Carte Bancaire) for riders in France.

Product Designer, Method Jun 2025 – Sep 2025

- Worked on research, product strategy and design for Google and Hitachi Energy.
- Presented design recommendations directly to client teams while completing my Master's thesis.

Growth Analyst, Intropic Jul 2021 – Mar 2023

- Closed deals with 10 hedge funds in the index-rebalance market, worth £500K ARR.
- Built a sales data pipeline and designed data visualisations to support commercial decisions.
- Joined as a Growth Intern and became Growth Analyst after three months.

Education

MSc Human-Computer Interaction, University College London

- Distinction. Dissertation: value tensions in citizens' expectations of AI-powered energy communities.

BSc Psychology, University College London

- First Class Honours.

Skills

Design	Product, interaction and visual design, motion, design systems, prototyping, user research
Build	Figma, SwiftUI, React, Astro, HTML and CSS, Claude Code, SQL, Python
Languages	English (native), Mandarin (native)
